Github: github.com/JINJ95 | LinkedIn: bit.ly/linkedinjinj | Portfolio: <https://jinj95.github.io/JJ-Portfolio/>

Software engineer with a strong work ethic and significant experience in Project Management. Fast learner that is flexible and enjoys finishing projects that exceed expectations. Motivated and fascinated about creating meaningful software that improves our quality of life. Studied at the University of Utah and became a Full Stack Web Developer. Enthusiastic about UX, UI, mobile responsiveness and back-end development. Always developing skills to discover and implement new technologies. Look forward to leveraging new cutting-edge technologies and bringing my best to an outstanding team.

Technical Skills

Frontend: HTML5, CSS, React, JQuery, Javascript, ES6, Bootstrap

Backend: MySQL, MongoDB, NoSQL, PHP, Express.js, Node.js, Handlebars

More: Java, Python, Amazon Web Services, Google Firebase

Projects

strtUP | Code: <https://github.com/JINJ95/strtUP> | Deployed Link: <https://brentp24.github.io/strtUP/>

Front-End / Back-End

- strtUP is a browser dashboard that incorporates widgets that reference you're most frequently accessed information.
- Responsible for making this application dynamic by connecting widgets to API's. Created the dynamic background, a few widgets and then implemented local storage so the users widget choices will stay active when the page is refreshed.
- HTML5, Javascript, JQuery, CSS, Moment.js, API's.

Employee-Tracker | Code: <https://github.com/JINJ95/Employee-Tracker> |

Front-End / Back-End

- Employee-Tracker is a solution for managing a company's employees using Node.js, inquirer, and MySQL!
- Created this project to increase my skill level with databases and working inside of a command line interface.
- Javascript, JQuery, Node.js, Inquirer, MySQL.

CarFacts | Code: <https://github.com/JINJ95/carFacts> | Deployed Link: [CarFacts on Heroku!](#)

Front-End / Back-End

- CarFacts is your all-in-one app to track all maintenance and modifications done to your vehicle.
- This application is beneficial to anyone that is interested in keeping track of their vehicle's history, current condition and future maintenance suggested for their specific make and model. CarFacts has been described as a Facebook for vehicles and we look forward to continuing development.
- Javascript, JQuery, Express, Sequelize, Passport, Handlebars, Bulma, API's

NoteTaker | Code: <https://github.com/JINJ95/NoteTaker> | Deployed Link: <https://frozen-harbor-30950.herokuapp.com/>

Front-End / Back-End

- NoteTaker is used to write, save and delete notes using an express backend.
- This application was a great way for me to sharpen my skills of creating a server and working with JSON data.
- HTML5, CSS, Javascript, Node.js, Express, JSON.
